"WORKSHOP ON LEARNING MANAGEMENT SYSTEM – VIRTUAL MODE"

The Medical Education Unit of SRMC organized a "**Workshop on Learning Management System – Virtual Mode**" from 20.08.2018 & 21.08.2018. The conception of an idea for such an innovative program was by our Honorable Chairman, Dr.M.Shanthiramudu which was successfully executed by the chairperson of MEU, Dr. M. Krishna Rao (Dean) and MEU Coordinator Dr.Sujith Devaprasad, Associate Professor of orthopedics. Workshop was conducted by resource person Dr. D.V Ashok Kumar, Director & Dean, RGM College of Engineering (Autonomous). The program lasted from 8.30 am to 4:30 pm on both days.

The Inaugural ceremony started with Dr.Madhavi Latha and a welcome speech by Dr.Sujith Deva prasad, Associate Professor of orthopedics. MEU Chair person, Inaugural address was given by Dr. M. Krishna Rao (Dean), SRMC.

Day1: Session was started by the resource persons with the introduction of the meaning of Learning Management system. The next session was on creating a course in a LMS and what the attributes to the same

Day2: The second day started with a lecture on the management of the course created the previous day. Post lunch was an activity on the course resources that can be used to build the LMS

The workshop was brought to a conclusion with the valediction function. The certificates were awarded to the participants and resource person.

"WORKSHOP ON LEARNING MANAGEMENT SYSTEM – VIRTUAL MODE"

The Medical Education Unit of SRMC organized a "**Workshop on Learning Management System – Virtual Mode**" from 12.09.2022 & 13.09.2022. The conception of an idea for such an innovative program was by our Honorable Chairman, Dr.M.Shanthiramudu which was successfully executed by the chairperson of MEU, Dr. M. Krishna Rao (Dean) and MEU Coordinator Dr.Sujith Devaprasad, Associate Professor of orthopedics. Workshop was conducted by resource person Dr. D.V Ashok Kumar, Director & Dean, RGM College of Engineering (Autonomous). The program lasted from 8.30 am to 4:30 pm on both days.

The Inaugural ceremony started with Dr.Madhavi Latha and a welcome speech by Dr.Sujith Deva prasad, Associate Professor of orthopedics. MEU Chair person, Inaugural address was given by **Dr. M. Krishna Rao (Dean), SRMC.**

Day1: Session was started by the resource persons with the introduction of the meaning of Learning Management system. The next session was on creating a course in a LMS and what the attributes to the same

Day2: The second day started with a lecture on the management of the course created the previous day. Post lunch was an activity on the course resources that can be used to build the LMS

The workshop was brought to a conclusion with the valediction function. The certificates were awarded to the participants and resource person.

SIMULATION & VIRTUAL LAB**

Report of the Workshop on Simulation and Virtual Lab – Virtual Mode

The Medical Education Unit of SRMC had organized a "workshop on Simulation and Virtual lab - Virtual Mode" from 11.12.2022 to 13.12.2022. The conception of an idea for such an innovative program was by our Honorable Chairman, Dr. M. Shanthiramudu which was successfully executed by the chairperson of MEU - Dr. M. Krishna Rao (Dean) and MEU Coordinator Dr. Sujith Devaprasad, Associate Professor of orthopedics. Workshop was conducted by resource person Dr. Vasanth R Chavan, Professor, Pharmacology. The program lasted from 8.30 am to 4:30 pm on three days.

The Inaugural ceremony started with lighting lamp and a welcome speech by Dr. Sujith Deva Prasad MEU Co-ordinator, Associate Professor of Orthopedics, SRMC. Inaugural address was given by Dr. Ravi Babu, Managing Director. The presidential address was delivered by the Dean, Dr. Krishna Rao and felicitations were done by Dr.T.N.Kumar.

Day 1: The workshop commenced with as lecture on Simulation and virtual labs - the new way to learn. The resource person discussed the ways in which simulation lab will enhance medical education. In the afternoon the resource person introduced the Physics Education Technology (PhET) for interactive simulations and its importance.

Day 2: The second day started with a group activity - Hands on PhET. Step by step guidance to develop a simulation lab was done. The method to develop and setting up of a virtual lab was conducted in the afternoon session.

Day 3: On the final day the day begun with introducing virtual box for virtual labs. The Virtual Box is a free and open-source software program for virtualizing the x86 computing architecture developed by oracle. The in-depth hand on activity in developing a virtual box was demonstrated.

The workshop was brought to a conclusion with the valediction function. The certificates were awarded to the participants and resource person.

Report of the Workshop on Simulation and Virtual Lab – Virtual Mode

The Medical Education Unit of SRMC had organized a "workshop on Simulation and Virtual lab - Virtual Mode" from 20.12.2021 to 22.12.2021. The conception of an idea for such an innovative program was by our Honorable Chairman, Dr. M. Shanthiramudu which was successfully executed by the chairperson of MEU - Dr. M. Krishna Rao (Dean) and MEU Coordinator Dr.Sujith Devaprasad, Associate Professor of orthopedics. Workshop was conducted by resource person Dr.T.N.Kumar, Professor, Pharmacology. The program lasted from 8.30 am to 4:30 pm on three days.

The Inaugural ceremony started with lighting lamp and a welcome speech by Dr. Sujith Deva Prasad MEU Co-ordinator, Associate Professor of Orthopedics, SRMC. Inaugural address was given by Dr. RaviBabu, Managing Director. The presidential address was delivered by the Dean, Dr. Krishna Rao and felicitations were done by Dr.T.N.Kumar.

Day 1: The workshop commenced with as lecture on Simulation and virtual labs - the new way to learn. The resource person discussed the ways in which simulation lab will enhance medical education. In the afternoon the resource person introduced the Physics Education Technology (PhET) for interactive simulations and its importance.

Day 2: The second day started with a group activity - Hands on PhET. Step by step guidance to develop a simulation lab was done. The method to develop and setting up of a virtual lab was conducted in the afternoon session.

Day 3: On the final day the day begun with introducing virtual box for virtual labs. The Virtual Box is a free and open-source software program for virtualizing the x86 computing architecture developed by oracle. The in-depth hand on activity in developing a virtual box was demonstrated.

The workshop was brought to a conclusion with the valediction function. The certificates were awarded to the participants and resource person.

MOODLE

"Workshop on Orientation and development of MOODLE"

The medical education unit of SRMC conducted a one-day workshop on orientation and development of Moodle. The resource persons of the program were Dr. Afsar Fatima, Professor, SPM, MEU member, SRMC, Nandyal.

The program started with an ice breaking session conducted by the members of the MEU to create harmony among the participants of the program. Following this the inauguration of the program was conducted presided by the Dean and the administrators of the college.

After a short tea break, the resource person introduced the concept of learning management system and the role of Moodle platform in developing an LMS for the institution. This was followed by a session on the components of Moodle and orienting the participants to it. The ways to learn the Moodle directory and the plugin structure was dealt in the next session. This familiarized the participants to the Moodle platform and its use in day-to-day teaching. The pre-lunch session was on the etiquettes in developing custom forms that the students will be submitting. The steps in processing and storing the data in custom database tables were demonstrated.

The post lunch session started with ways to create new Moodle pages and how to build and maintain them. The next session taught the participants to build a new capability for another facilitator and how to add a new role.

The program was ended with the valediction ceremony where the participants were awarded certificates.

Program schedule for "Workshop on Orientation and development of MOODLE" - 21.10.2019

S.No	Time	Topic
1.	8.30AM - 9AM	Ice breaking
2.	9AM - 9.30 AM	Inauguration
3.	10AM - 10.15 AM	Tea Break
4.	10.15AM - 10.45 AM	Introduction to LMS and Moodle
5.	10.45 AM - 11.30 AM	Components of Moodle
6.	11.30 AM - 12.15 PM	Learn the Moodle directory/ plugin structure.
7.	12.15 PM - 01.00 PM	Create custom forms that users can submit. Process and store that data in custom database tables
8.	01.00 PM - 02.00 PM	LUNCH
9.	02.00 PM - 02.30 PM	Create new Moodle pages
10.	02.30 PM - 03.30 PM	Create a new capability and add it to a role.
11.	03.30 - 04.00 PM	Valediction

About College

Santhiram Medical College with a noble motto of "EDUCATION FOR SERVICE" started its teaching hospital in the year 2004 with 300 beds. The Topography of Santhiram Medical College spreads on the lush green and sprawling 48 acres Campus with more than built-up area of 15,00,000 Sft comprising buildings of Medical College, Teaching Hospital and all hostels along with required Staff Quarters. With the immaculate practices in the field of education since four decades, **Dr.M.Santhiramudu**, the President of **SHAFU EDUCATIONAL SOCIETY**, is an educationalist and philanthropist who is dedicated to the noble pursuit of knowledge and is a beacon of inspiration in shaping the minds of future generations and succeeded in establishing Medical college thus by providing medical education and health care in Nandyal, located in the backward region of Rayalaseema.

VISION

To impart medical education with Academic excellence and practice medicine ethically in line with global standards. To produce Doctors from Rural India with high morals, ethics and professional standards and enrich their acumen in medical field and inculcate compassion health care and finally attain this institute as a Deemed to be Medical University.

MISSION

- M1: To impart world class quality health care and medical education
- M2: To provide in hand experience to students and train them with knowledge and skills.
- M3: To inculcate values and ethics.
- M4: To identify hidden talent and provide opportunities to students to realize and utilize their full caliber.
- M5: To nurture the students into future leaders, entrepreneurs and good human beings.

QUALITY POLICY

We strive to provide excellent education along with practical exposure through exceptional resources having highly skilled professionals, to ameliorate students competency for the contribution of health care profession in the society,

Workshop on " Learning Management System – Virtual Mode"

Venue:

MEU Conference Hall,
College Block, SRMC.

Program schedule:

20.08.2018 & 21.08.2018.
8.30 am to 4:30 pm

to ameliorate students competency for the contribution of health care profession in the society, through consistent improvements in the quality of all aspects to attain and set highest standards among the graduates with expertise, committed research engagement in education, treat patients with caring, sustained learning and adopting, leadership qualities and team work abilities.

About the Program

This is a form of software that enables companies and educational institutions to create and manage lessons, courses, quizzes and other training materials. One key component in an enterprise LMS platform is a course library where instructors can create or add new courses— either creating the courses from scratch or purchasing new courses to add to the company's library. An LMS helps companies manage different types of educational content. Users can upload Sharable Content Object Reference Model or Aviation Industry Computer-Based Training Committee content, such as a training presentation or quizzes, to an LMS.

A Teacher can:

Add, edit, and delete learning outcomes associated with course content. Create, view, and post to course announcements and discussions. Create and edit rubrics. Create conferences and student collaborations.

Resource Person:

Dr. D.V. Ashok Kumar,

Director

RGM College of Engineering (Autonomous)

Program schedule:

25.10.2021 & 26.10.2021

8.30 am to 4:30 pm

to ameliorate students competency for the contribution of health care profession in the society, through consistent improvements in the quality of all aspects to attain and set highest standards among the graduates with expertise, committed research engagement in education, treat patients with caring, sustained learning and adopting, leadership qualities and team work abilities.

About the Program

LMS is defined as a learning management system as a computer program that helps employers train learners or employees. Also, an LMS provides the tools employers need to write training content. An LMS makes it possible to distribute training and track learners' progress. LMSs can deliver and manage all types of content, including videos, courses, workshops, and documents. They can also help training professionals within a company manage their training program from one centralized environment.

The following crucial classroom teaching-learning practices:

- Creating an effective syllabus & teaching-plan
- Systematic record maintenance of students' activities
- Grading & tracking student progress
- Creating & conducting online tests & assessments
- Providing relevant & advanced e-content
- Strong teacher-student collaboration

to ameliorate students competency for the contribution of health care profession in the society, through consistent improvements in the quality of all aspects to attain and set highest standards among the graduates with expertise, committed research engagement in education, treat patients with caring, sustained learning and adopting, leadership qualities and team work abilities.

About the Program

A learning management system (LMS) is a software tool or web-based technology that helps plan, implement, and assess learning processes. It can be used for a variety of purposes, including, Training Companies can use LMSs to deliver training materials, standardize training programs, and certify workers. LMSs can be accessed on mobile devices, making it easy to reach people wherever they are.

Education

Teachers and instructors can use LMSs to automate the process of delivering lessons, creating and grading assessments, and tracking student progress. Parents and guardians can also have access to their child's class schedule, outlines, and assessment dates.

LMSs can deliver and manage all types of content, including videos, courses, workshops, and documents. They can also help training professionals within a company manage their training program from one centralized environment.

The crucial classroom teaching-learning practices are

- Creating an effective syllabus & teaching-plan
- Systematic record maintenance of students' activities
- Grading & tracking student progress
- Creating & conducting online tests & assessments

Workshop on "Orientation and Development of

MOODLE"

Venue:

MEU Conference Hall,
College Block, SRMC.

Program schedule:

21.10.2019

8.30 am to 4:30 pm

through consistent improvements in the quality of all aspects to attain and set highest standards among the graduates with expertise, committed research engagement in education, treat patients with caring, sustained learning and adopting, leadership qualities and team work abilities.

About the Program

Modular Object Oriented Dynamic Learning Environment (MOODLE) was originally developed by Martin Dougiamas to help educators and scholars create online courses and focus on interaction and collaborative construction of content. The first version of Moodle was released on 20 August 2002 (21 years ago), and it continues to be actively developed. Moodle is the world's most recognised learning management system (LMS) and although used across many sectors and organisations, it is particularly beneficial for the education sector. A Moodle platform has the power to streamline training processes for the best learning experiences and proves to be invaluable when it comes to structuring and sharing course materials with learners, and also in monitoring and assessing progress.

Benefits of Moodle for Educators

Sharing learning materials – With a Moodle platform's rich resource toolkit, files and links to websites can be shared with learners easily. Pages of learning content – combining text, images and embedded video – can also be quickly created within a course. With a rich variety of tools to encourage your learners to participate in online learning, a Moodle platform is the ideal solution to bring your classroom into the 21st century. Don't just take our word for it, read our case studies to see how a Moodle solution has proven successful our clients in the education sector.

Topics to be covered :

- Collecting database
- Displaying student work
- Interacting with external tools

Resource Person:

Dr. Afsar Fatima,
Professor, Dept. of SPM,
SRMC, Nandyal

Workshop on " Simulation and Virtual lab - Virtual Mode"

Venue:

**MEU Conference Hall,
College Block, SRMC.**

Program schedule:

18.01.2021 to 20.01.2021

8.30 am to 4:30 pm

to ameliorate students competency for the contribution of health care profession in the society, through consistent improvements in the quality of all aspects to attain and set highest standards among the graduates with expertise, committed research engagement in education, treat patients with caring, sustained learning and adopting, leadership qualities and team work abilities.

About the Program

The biggest difference between simulations and hands-on labs is that simulations are a replication of a specific use case or existing technology or software. Virtual labs, on the other hand, are real, non-production environments of the technology or software where users can freely explore and complete objectives.

Virtual labs:

- Learners actively practice applying what they've learned.
- Outcome-based tasks so learners can arrive at the correct solution in multiple ways or safely "fail forward".
- Enables intentional learning experiences with integrated instruction sets that enable as little or as much structure as you desire.
- Can easily update and manage the environment as software changes.
- Capable of automatic grading via scored labs to remove manual checking a learner's performance.

Simulations:

- Limited or not really hands-on. Simulations may contain objectives but are usually met by clicking through instructions or checking boxes.
- Reliant on manually programming prescriptive instructions of how a user can correctly arrive at the solution.
- Learning environments are less structured and may require additional learning materials to provide an organized learning experience.
- Harder to update as software changes.
- Limited scoring or assessment capabilities that fail to provide in-depth learning insights.

Simulation labs contain a variety of specialized manikins (models), electronics and audio video equipment. The quantity and type of equipment depends the learning needs of the participants, the available space and the budget to operate, build, maintain and staff each laboratory. Simulation is a generic term that refers to an artificial representation of a real world process to achieve educational goals through experiential learning. Simulation based medical education is defined as any educational activity that utilizes simulation aides to replicate clinical scenarios. A simulation laboratory for developing basic clinical, procedural and surgical skills. Simulation centre allows medical students to effectively manage, record, and assess simulation training, both on-site and in-situ. Capture audio, video, annotations, patient monitors, and simulator data. Once replayed, the student is debriefed about the performance and suggested methods for improvement. The simulation centre is effective to deliver high-quality clinical training, medical education, and quality improvement in clinical skills.

- M5: To nurture the students into future leaders, entrepreneurs and good human beings.

QUALITY POLICY

We strive to provide excellent education along with practical exposure through exceptional resources having highly skilled professionals, to ameliorate students competency for the contribution of health care profession in the society,

SANTHIRAM MEDICAL COLLEGE

NH-40, Nandyal-518501, A.P..

Workshop on "Simulation and Virtual lab - Virtual Mode"

Venue:

MEU Conference Hall,
College Block, SRMC.

Program schedule:

20.12.2021 to 22.12.2021
8.30 am to 4:30 pm

to ameliorate students competency for the contribution of health care profession in the society, through consistent improvements in the quality of all aspects to attain and set highest standards among the graduates with expertise, committed research engagement in education, treat patients with caring, sustained learning and adopting, leadership qualities and team work abilities.

About the Program

The biggest difference between simulations and hands-on labs is that simulations are a replication of a specific use case or existing technology or software. Virtual labs, on the other hand, are real, non-production environments of the technology or software where users can freely explore and complete objectives.

Virtual labs:

- * Learners actively practice applying what they've learned.
- * Outcome-based tasks so learners can arrive at the correct solution in multiple ways or safely "fail forward".
- * Enables intentional learning experiences with integrated instruction sets that enable as little or as much structure as you desire.
- * Can easily update and manage the environment as software changes.
- * Capable of automatic grading via scored labs to remove manual checking a learner's performance.

Simulations:

- * Limited or not really hands-on. Simulations may contain objectives but are usually met by clicking through instructions or checking boxes.
- * Reliant on manually programming prescriptive instructions of how a user can correctly arrive at the solution.
- * Learning environments are less structured and may require additional learning materials to provide an organized learning experience.
- * Harder to update as software changes.
- * Limited scoring or assessment capabilities that fail to provide in-depth learning insights.

Simulation labs contain a variety of specialized manikins (models), electronics and audio video equipment. The quantity and type of equipment depends the learning needs of the participants, the available space and the budget to operate, build, maintain and staff each laboratory.

Simulation is a generic term that refers to an artificial representation of a real world process to achieve educational goals through experiential learning. Simulation based medical education is defined as any educational activity that utilizes simulation aides to replicate clinical scenarios. A simulation laboratory for developing basic clinical, procedural and surgical skills.

Simulation centre allows medical students to effectively manage, record, and assess simulation training, both on-site and in-situ. Capture audio, video, annotations, patient monitors, and simulator data. Once replayed, the student is debriefed about the performance and suggested methods for improvement. The simulation centre is effective to deliver high-quality clinical training, medical education, and quality improvement in clinical skills.

Resource Person:

Dr. T.N. Kumar,
Professor, Pharmacology
SRMC, Nandyal.

About College

Santhiram Medical College with a noble motto of "EDUCATION FOR SERVICE" started its teaching hospital in the year 2004 with 300 beds. The Topography of Santhiram Medical College spreads on the lush green and sprawling 48 acres Campus with more than built-up area of 15,00,000 Sft comprising buildings of Medical College, Teaching Hospital and all hostels along with required Staff Quarters. With the immaculate practices in the field of education since four decades, Dr.M.Santhiramudu, the President of SHAFI EDUCATIONAL SOCIETY, is an educationalist and philanthropist who is dedicated to the noble pursuit of knowledge and is a beacon of inspiration in shaping the minds of future generations and succeeded in establishing Medical college thus by providing medical education and health care in Nandyal, located in the backward region of Rayalaseema.

VISION

To impart medical education with Academic excellence and practice medicine ethically in line with global standards. To produce Doctors from Rural India with high morals, ethics and professional standards and enrich their acumen in medical field and inculcate compassion health care and finally attain this institute as a Deemed to be Medical University.

MISSION

- M1: To impart world class quality health care and medical education
- M2: To provide in hand experience to students and train them with knowledge and skills.
- M3: To inculcate values and ethics.
- M4: To identify hidden talent and provide opportunities to students to realize and utilize their full caliber.
- M5: To nurture the students into future leaders, entrepreneurs and good human beings.

QUALITY POLICY

We strive to provide excellent education along with practical exposure through exceptional resources having highly skilled professionals, to ameliorate students competency for the contribution of health care profession in the society,
