## REPORT OF GENDER EQUITY PROMOTION PROGRAMMES

There is no doubt about the fact that development of women has always been the central focus of planning since Independence. Empowerment is a major step in this direction but it has to be seen in a relational context.

A clear vision is needed to remove the obstacles to the path of women's emancipation both from the perspective of the government as well as women themselves. Efforts should be directed towards all round development of each and every section of Indian women by giving them their due share.

In consideration of the welfare of women, Santhiram Medical College established the WOMEN EMPOWERMENT CELL to empower women and to create awareness of Women's Right.

The objectives of the cell are

- To organize events and activities for women empowerment and to create an environment to
- realize their full potential. To conduct workshops and awareness programmes with a motive to train girls about self- defense, health benefits and skill development.
- To create social awareness about the problems of women particularly regarding gender discrimination.
- To organize awareness programs on gender sensitization.
- Women's Day celebration.
